COUNTRY:
Poland

CITY:
Bydgoszcz

Programming Skills:

- C# (.NET)
- WPF
- Angular
- Entity Framework
- SQL
- Git
- CI/CD
- HTML
- CSS
- React JS
- Django
- Bootstrap
- ASP.NET Core
- Razor Pages
- React Router
- FontAwesome
- react-i18next

EmailJS Soft Skills:

- Problem-Solving
- Team Collaboration
- Project Management
- Communication
- Adaptability
- Attention to Detail
- Time Management

Oreste TWIZEYIMANA

ABOUT ME

I am an upcoming graduate (expected September 2024) with over two years of experience as a Junior .NET Developer. I specialize in building and deploying scalable backend applications, focusing on data mapping, integrations, and performance optimization.

Recently, I took a six-month break to complete my studies and expand my skill set. During this period, I enhanced my knowledge of React and Angular by creating a portfolio website, and revisited Python to improve my Django and Flask development skills.

I also refined my Git and code review skills by assisting classmates with their projects. I am now seeking a role that leverages my .NET expertise and allows me to apply my newly acquired frontend skills.

Work Experience

September 2021 – February 2024

Junior .NET Developer at Oponeo.pl Bydgoszcz, Poland

Achievements

Payment Integration:

- Successfully implemented Klarna for orders in various countries.
- Streamlined the handling of refunds and cancellations, significantly reducing processing time.

Automation:

- Designed an automated system for retrieving shipment statuses from DPD, DHL, and GLS.
- Significantly improved customer notification regarding order statuses.

Web Applications:

- Enhanced internal web services and applications, leading to a significant performance boost.
- Optimized data exchange with SQL Server for improved security and faster response times.
- I implemented new features for smoother user experience and enhanced application usability.

Additional Skills:

- RESTful APIs
- Unit Testing
- Database Design
- Performance Optimization
- Security Practices

EDUCATION

October 2018 – Present

Wyższa Szkoła Gospodarki w Bydgoszczy
Computer Engineering and Mechatronics

PROJECTS

1. *Dolt-Ticketing System*

- **Overview:** Developed a comprehensive ticket management system, allowing users to create, view, update, and delete tickets. The system includes user registration and login features.
- **Key Responsibilities:** Implemented ticket and user management features; built the API with Flask and frontend with Angular.
- **Technologies:** Flask, Angular, SQLite.
- **Key Contributions:** Increased user engagement and administrative efficiency through robust feature implementation.

2. *Project Name: Multilingual React Portfolio Website*

- **Overview:** Developed a responsive and multilingual portfolio website to showcase personal projects, technical skills, programming expertise, language proficiency, and contact information.
- **Key Responsibilities:** Led the development process, integrated modern design principles, implemented internationalization, and added interactive elements. Designed and integrated a contact form.
- **Technologies:** React, Bootstrap, React Router, FontAwesome, react-i18next, EmailJS.
- **Key Contributions:** Demonstrated frontend development proficiency and versatility with React. Created a responsive and user-friendly interface supporting multiple languages, and managed contact form submissions effectively.

3. *Project Name: StockIT*

- **Overview:** A web application for inventory management, providing a real-time view of stock levels.
- **Key Responsibilities:** Oversaw development, collaborated with cross-functional teams; developed core functionalities.
- **Technologies :** ASP.NET Core, Razor Pages, Entity Framework Core.
- **Key Contributions:** Implemented a user-friendly interface; ensured data integrity and scalability.

4. *Django Real Estate Website*

- **Overview:** Developed a comprehensive real estate platform with user account management, property listings, and a booking system.
- **Key Responsibilities:** Implemented user features for property visits and bookings; built an admin dashboard.
- **Technologies :** Django, Bootstrap, SQLite.
- **Key Contributions:** Enhanced user engagement and administrative efficiency through robust feature implementation.
