Core Stack

- C# / .NET 8
- ASP.NET Core Web API
- Entity Framework Core
- SQL Server
- Docker
- GitHub Actions (CI/CD)
- Azure App Service

Languages

- **English** — Fluent (C1)
- **French** — Native / C2
- **Spanish** — Basic (A2)
- **Polish** — Fluent

Professional Summary

Backend-focused **.NET Developer with 2.5+ years of commercial experience** working on **high-traffic e-commerce systems at Oponeo**. Specialized in ASP.NET Core (.NET 8), SQL performance optimization, REST API design, and production-ready cloud deployments.

Strong focus on clean architecture, maintainability, CI/CD automation, and delivering measurable business impact in live production environments.

Professional Experience

Junior .NET Backend Developer — Oponeo.pl

Sep 2021 – Feb 2024 | Bydgoszcz, Poland

ASP.NET Core · C# · SQL Server · REST APIs · Docker · CI/CD

- Developed and maintained **ASP.NET Core Web APIs** serving a high-traffic e-commerce platform
- Improved **database performance by ~25%** through query tuning, indexing, and schema optimization
- Worked on payment-related backend flows in production, contributing to a ~30% reduction in incidents
- Contributed to **CI/CD pipelines** and Docker-based deployments
- Refactored legacy codebases following **SOLID principles and Clean Architecture**
- Worked in Agile/Scrum teams on live production systems

Key Projects

StockIT — Production Inventory System (Thesis Project)

.NET 8 · ASP.NET Core · EF Core · Docker · CI/CD · Azure

- Production-ready backend deployed to Azure App Service
- CI/CD pipeline with containerized deployment
- Clean Architecture with clear separation of concerns
- Relational database design with performance optimization

DreamNDine API

ASP.NET Core · JWT · SQL · AutoMapper

- Layered backend architecture (API / Application / Infrastructure)
- JWT authentication and authorization
- Complex business logic (availability, pricing, filtering)

BookStoreProject

ASP.NET Core · Razor Pages · EF Core

- Full CRUD application with relational data model
- Search and filtering functionality
- Clear demonstration of backend fundamentals

Positioning

- **Target roles:** .NET Backend Developer, Backend Software Engineer (Junior+/Regular)
- **Level:** Junior+ / Regular-ready
- **Availability:** Immediate
